

Is your business relocating or expanding?

WE'LL ANSWER YOUR KEY QUESTIONS AT EVERY DECISION POINT

From site selection all the way through to ongoing operations, you'll have different needs, challenges and questions. Entergy is here to work with you at each step along the way.

Our commitment to working closely with customers is part of Entergy's business model change from supplier to strategic partner. Learn more about how this works from Entergy's EVP & Chief Operating Officer Paul Hinnenkamp's blog post, [Designing the Utility of the Future With and For Our Customers](#).

Follow the [goentergy.com](#) links below for an introduction to the services, tools and experts we provide for large industrial projects. Then [contact us](#) early in your planning process to learn how many ways we can help — probably more than you thought.

What site will be best for our business?

Take advantage of our [confidential site selection services](#) before you release your plans publicly.

Our team can provide GIS mapping and demographic analysis, conceptual site layouts, and site evaluations, to identify the best match for your site requirements.

From the Entergy blog: [Entergy's New Site Selection Center is Open for Your Business](#)

Can Entergy meet our operational needs?

Our team can also create a custom solution to address your needs for high-priority power quality and outage management. These services include a tailored electrical and infrastructure solution and coordinating all internal communications between transmission and distribution planning.

From the Entergy blog: [YES, Entergy is Ready to Power Your Industrial Project](#)

Will we get a favorable rate?

Entergy provides [affordable, reliable energy](#) with a diverse fuel mix of nuclear, natural gas, coal and renewable power, and commercial and industrial rates are usually below the national average.

The savings and reliability we offer major industrial customers are supported by our membership in MISO or Midcontinent Independent System Operator, Inc.

Let our team help you prepare a detailed rate analysis including estimates on load and energy requirements. We can also provide assistance in these two areas:

- 1 Identifying competitive rates and riders
- 2 Negotiating complex contracts and special rate contracts

Can Entergy help us meet our sustainability commitments?

We offer a clean fuel mix and are among just four U.S. electric utility companies named to the [2019 Dow Jones Sustainability North America Index](#) for excellence in developing and implementing long-term economic, environmental and social strategies and actions.
